### [Best Overall: Away "The Carry-On"](#)

[BUY ON AWAYTRAVEL.COM](https://awaytravel.com)

You're probably already familiar with Away luggage, what with it seemingly being the choice of Instagram influencers everywhere. But Away luggage doesn't just have their stamp of approval—it has Brides' too! Take it for a spin and we promise you'll love it just as much as those bloggers on your feed. The Carry-On model is a particular fan-favorite, as it's designed to fit in the overhead bin of most major airlines, thus saving you time at the airport.

Despite the more petite size, this baby still totes plenty of bells and whistles like a durable polycarbonate shell, 360-degree spinner wheels, and an interior compression system to free up as much space as possible. But the real star of the show here is that the suitcase holds an internal, ejectable, and TSA-approved battery, allowing you to charge your phone on the go—and without battling your spouse for the last outlet in the airport.

### [Best Underseater: AmazonBasics Underseat Luggage Suitcase With Wheels](#)

[BUY ON AMAZON](#)

It's a bit of a catch-22: With a traditional carry-on rolling suitcase, you have to stand up and go digging through the overhead bin if you forget to pull out your headphones or book before the flight takes off, thus disturbing your seatmate. Do you really want to get on each other's nerves so soon after the wedding? Alternatively, if you bring a backpack or tote bag that you can keep at your feet during the flight, you're stuck lugging it through the airport when you land.

That's where the AmazonBasics Underseat Luggage Suitcase comes into play. It's designed to fit beneath the seat in front of you, so you can keep it nearby—but it also totes smooth-rolling wheels and a telescoping push-button handle, so you can easily glide through the airport. Especially with that budget-friendly price tag, it's a serious win-win.

### Best Carry-On: Briggs & Riley Baseline-Softside CX Expandable Carry-On Spinner Luggage

[BUY ON AMAZON](#)

Don't let this little black bag fool you. Despite its unassuming appearance, it takes the (wedding) cake when it comes to carry-on luggage. Crafted from ballistic nylon, this bag is abrasion resistant and water repellent to keep all of your belongings extra secure. And about those belongings...You can pack more of them, thanks to the expandable, roomy interior and a next-level compression system that makes overpacking practically impossible. Simply pull upward on the two expanding handles inside the bag to increase the depth and free up some extra space.

When you're through with packing, just zip up the suitcase and gently push down to engage the compression mechanism that locks into place. We also love how the bars for the top handle are located on the *outside* of the bag. This allows the interior to lay flat for even more packing space. ## What to look for in luggage

### Durability

Whether you prefer hard or soft-sided luggage, you want it to hold up to being tossed around at baggage claim. For hard-sided luggage, look to polycarbonate construction and for soft-sided choose a durable fabric like nylon.

### Size

You also want to take care when it comes to the size of your luggage. Pay attention to airline regulations (more on that below!), but to maximize packing space, look for features like expanding capabilities and easy-to-access compartments. You may also want to consider the weight of the luggage in order to ensure you stay under your airline's weight limits and you aren't struggling to pull or carry your bag along.

### Wheelability

For rolling luggage, wheelability is another aspect to pay attention to. Many travelers prefer four-wheeled luggage for their 360-degree spin. If you prefer two wheels, be sure that they are easy to maneuver and roll smoothly. (You'll be thankful for those easy-rolling wheels when you hit those cobblestone streets!)

## FAQ

### What is the best checked luggage size?

The size limits for your checked luggage may vary from airline to airline, so it's best to check the exact specifications of your flight carrier before heading to the airport. Commonly though, checked luggage shouldn't exceed 62" linear or weigh more than 50 pounds. If your bag is over these measurements, you may incur additional fees.

---

### What's the best carry-on luggage size?

Carry-on luggage on the other hand needs to fit either in the overhead compartment or beneath the seat in front of you. Like checked luggage, the exact specifications can vary between airlines, but 22" x 14" x 9" is usually the standard size of a carry-on bag on a domestic flight.

---

## What are international luggage restrictions?

It ranges on different airlines and destinations, so make sure to double-check for specifics before heading to the airport. In general, or on international flights it's best to score a carry-on suitcase 21" or less to ensure you meet the requirements of the airline (and any regional airlines you may travel with while abroad).
